COMMUNITY LEADERS

This is a compilation of trusted XRPL resources and educators.

We can not vouch for everything that they might say, but we have found them to be extremely helpful when we are doing research. They are not financial advisors or licensed entities but they are experienced and have amassed quite a following. If you are interested in developments on XRP outside of what onXRP.com has provided, these are people that you might want to follow when you are doing your own research. As always, we recommend everyone to do research and make their own decisions!

Stablecoins and CBDCs Could Co-Exist - Says Fed Chairman Jerome Powell

What is a stablecoin? First, we need to understand what a stablecoin is. More specifically,...
